Index to volume 22, 1984 — Ultrasonics

Titles of articles

(RN denotes Research Note; L, Letter to Editor)

1 A multiple function sonar rangefinder for divers, *G. Shorrock, B. Woodward* *16*
2 A pinhole-plate ultrasonic atomizer, *N. Maehara, S. Nakane, K. Yamamoto, K. Iga* 259
3 A programmable pulse generator for piezoelectric multielement transducers, *M. Certo, D. Dotti, P. Vidali* 163
4 A simple device for checking the acoustic beam of ultrasonic therapy equipment, *B. Breyer, B. Devčić* 285
5 A systems feedback representation of piezoelectric transducer operational impedance, *G. Hayward* 153
6 Acoustic cavitation: an introduction, *E.A. Neppiras* 25
7 Acoustic cavitation inception, *R.E. Apfel* 167
8 An algorithm to improve signal-to-ncise discrimination in Doppler spectrum analysers, *T. D'Alessio, A. Catanzariti, C. Di Giuliomaria, A. Cavallaro* 282
9 Bubble phenomena in sound fields: part one, *A. Prosperetti* 69
10 Bubble phenomena in sound fields: part two, *A. Prosperetti* 115
11 Characterization of cavitation in a flow-through exposure chamber by means of a resonant bubble detector, *D.L. Miller, A.R. Williams, D.R. Gross* 224
12 Design and construction of short pulse ultrasonic probes for non-destructive testing, *G.C. Low, R.V. Jones* 85
13 Double Bragg and Bragg/normal diffraction of two laser beams by ultrasound, *O. Leroy, E. Blomme* 125
14 Double Doppler ranging system using FM ultrasound, *H. Mitome, T. Koda, S. Shibata* 199
15 Experimental investigation of reflection coefficients for lossy liquid–solid–liquid systems, *M. de Billy, G. Quentin* 249
16 Fresnel diffraction fields of ultrasonic phase gratings under double beam illumination, *K. Patorsky* 253
17 Gas body activation, *D.L. Miller* 261
18 Influence of ultrasound on extraction of tannins from deoiled salseed cake, *V.S. Rao, K.M. Swamy, K.L. Narayana* 29
19 Modern methods of improving the range accuracy of CFTM sonars, *M.A. Do* 110
20 On the signal-to-noise ratio enhancement of the Doppler process, *I. Amir, V.L. Newhouse* 231
21 Piezoelectric multilayer transducers for ultrasonic pulse compression, *K.M. Sung* 61
22 Quicker, simpler hardness testing using ultrasonics, *J. Szilard* 174
23 Rectified diffusion, *L.A. Crum* 215
24 Sonochemistry in non-aqueous liquids, *K.S. Suslick, J.J. Gawienowski, P.F. Schubert, H.H. Wang* 33
25 The measurement of residual stress in textured steel using an ultrasonic velocity combinations technique, *D.R. Allen, C.M. Sayers* 179
26 The practical design of ultrasonic test tanks, *J.D. Aindow, R.C. Chivers* (RN) 139
27 Transmission circuits for thick-transducer ultrasound transmission test systems, *R.E. Challis, J.A. Harrison* 103
28 Transverse and longitudinal resolution of the synthetic aperture focusing technique, *R.N. Thomson* 9
29 Ultrasonic detection of hydrogen in pipeline steel, *P. Senior, J. Szilard* (RN) 42
30 Ultrasonic hardening of aluminium alloys, *A. Peslo* 37
31 Ultrasonic instrument for measuring bolt stress, *S.G. Joshi, R.G. Pathare* 270
32 Ultrasonic Lamb wave method for sizing spot welds, *F. Bendec, M. Peretz, S.I. Rokhlin* 78
33 Ultrasonic properties of transducer backings, *C.M. Sayers, C.E. Tait* 57
34 Ultrasonic synthetic aperture focusing using planar pulse–echo transducers, *S.F. Burch, J.T. Burton* 275
35 Use of focused ultrasound for stimulation of nerve structures, *L.R. Gavrilov* 132
36 Use of off-axis SH–waves to map out three-dimensional stresses in orthotropic plates, *A.V. Clark, Jr, R.B. Mignogna* 205

Book reviews

Review of progress in quantitative non-destructive evaluation, Vol 2A and B, Edited by D.O. Thompson, D.E. Chimenti 142
Ultrasound in medical diagnostics and therapy, Edited by E. Cech 46
Underground sound, J.E. White 46

Conference reports

Interaction of ultrasound with biological media, Yerevan, USSR, 1–4 June 1983 190
Second spring school on acousto-optics and applications, Gdansk-Wiezyca, Poland, 24–29 May 1983 45
Ultrasonic Industry Association: fifteenth annual technical symposium, New York, USA, 4 April 1984 287
Ultrasonics International 83, Halifax, Nova Scotia, Canada, 12–14 July 1983 189

Research and development

Data system for ultrasonic eye scanner 99
No disturbance in gas flow measurement 3
Trials of ultrasonic scanner for cancer detection 99

New equipment

Accessory monitors and interprets echo sounders 247
Accurate measurement of flaw depth is simplified 244
Acoustic emission analyser for glass reinforced plastics 4
Acoustic microscope can penetrate materials 243
Antepartum monitor is suitable for labour-ward 6
Battery operated rail tester 148
Butterfly gives name to fluorography system 52
Characterizing zeta potentials 100
Cleaning unit for oil filters 100
Coatings pose no problem for EMAT system 246
Compact cleaners save energy and vapour losses 244
Computer-controlled test system 101
Computer-controlled wave-form generator 245
Doppler unit for blood vessels 54
Dry gel warmer 52
EAARS to avoid obstacles 150
Fetal monitor uses three microprocessors 150
Flat response piezoelectric sensor 53
Flaw detector for field, factory and laboratory 243
Flaw detector for non-metallic materials 195
Flaw detector gives greater accuracy for ndt 52
Flaw detector has distortion-free CRT 5
Flaw detector modified 148
Gated amplifiers for versatile operation 5
Hand-held thickness gauge 53
Hardness tester uses ultrasound 197
Heat pumps for cleaning systems 101
High resolution scanner 4
Higher frequency plastics assembly 147
Hospital instrument cleaning systems 100
Imaging system for nde 243
Immersion tanks 151
Implantable volumetric blood flowmeter 55
Interface allows hard copying of ndt traces 100
Large screen flaw detector 195
Lightweight ultrasonic flaw detector 3
Liquid processing system 4
Low frequency flaw detector 245
Main-frame unit measures velocity and attenuation 5
Mains or battery operated flaw detector 147
Microprocessor controls flaw detector 148
Miniature medical Doppler probes 5
Miniaturized ndt reporting system ... 244
Modular inspection system 196
Modular sonar systems 6
Multi-channel test instrument for ndt 197
New principle for digital thickness gauge 150
No liquid couplants 244
Plastic pipe wall thickness measurement system 7
Plastic welding machines 198
Polishing tools for surface engineering 246
Portable real time scanner 53
Precise underwater location measurements 149
Programmable handling system 51
Rail inspection system uses ultrasound 100
Rapid gauging for thin sections 243
Scanner test objects 51
Sensitive air emboli detector 101
Single longitudinal-mode transducers for ndt 246
Subsea flaw detection system 195
Survey fathometer can operate at two frequencies 147
Thickness gauge redesigned 151
Thickness meter has built-in memory 247
Transducer has flat frequency response 99
Transducer manipulator 246
Transducers for contact and immersion testing 52
Ultrasound couplant for obstetrics ... 197
Ultrasound keeps quarry's trains on time 51
Ultrasonic visualization equipment ... 198
Welding boxes for plastics assembly systems 196
